Subject: Example memo for "2-N" Categorization for Block P Mine Complex activities [Barker-Hughesville]

Roger,

You asked for additional suggestions regarding AMEC-FW's work plans this year. I recommend you initiate something like the attached memo through Joe to properly characterize the low-level of fluid hazard posed by the work that AMEC-FW discussed at our last conference call. This type of memo is used routinely in the Removal and Remedial programs to document a Regional decision that a particular site's planned activities to not rise to the level of fluid hazard concern to warrant entering into the OLEM consultation process.

Sincerely,

James Hanley, P.E. (mining engineer)
